

Syteca's Privileged Account Discovery

Automatically detect, onboard, and manage privileged accounts.

Secure privileged accounts and streamline cybersecurity operations

Minimize risks from unmanaged privileged accounts and boost operational efficiency with Account Discovery, Syteca's newest PAM feature that automates detection across Active Directory and local Windows systems to ensure no account is missed.

Automated discovery

Automatically scan for all privileged accounts within your network.

Multi-domain discovery rules

Customize discovery rules to scan multiple domains, organizational units, or user groups according to a modifiable schedule.

Flexible onboarding

Onboard each revealed account separately or use the bulk onboarding option to set up multiple accounts at once.

Secure password options

Choose to have passwords automatically generated or set them manually, and enable or disable automatic password rotation.

Email notifications

Receive email notifications about newly detected privileged accounts after each scan.

Granular permissions and audit logs

Manage who can access your account discovery data. Track all AD activities with comprehensive audit logs.

Benefits of Syteca's Account Discovery

Enhanced security and compliance

Identify and onboard all privileged accounts to close security gaps, prevent unauthorized access, and simplify compliance with regulations like GDPR and HIPAA.

Increased operational efficiency

Automate account discovery and management functions to reduce manual work, freeing up IT for strategic tasks and lowering operational costs.

Improved visibility and control

Get a centralized view of all privileged accounts to ensure accountability and oversight across your network.

Reduced attack surface

Identify and secure forgotten or hidden accounts to minimize entry points and lower the risk of data breaches.

Robust access management

Continuously detect and adjust excessive privileges to prevent privilege abuse and enhance access management.

Secure growth

Scale confidently with complete control of critical accounts, managing privileged access across domains and user groups as you expand.

Syteca provides targeted solutions for your privileged access management needs

The challenge

Ensuring that everyone in your organization has the right level of access and keeping security risks at a bare minimum.

Eliminating the use of weak passwords and controlling password sharing to protect your systems from cybersecurity threats.

Maximizing user activity transparency to prevent privilege misuse that might compromise critical data.

Eliminating blind spots in cybersecurity resulting from unmanaged privileged accounts.

The Syteca solution

Granular access management for your organization's endpoints. Verify user identities, grant permissions, and reduce the risks of unauthorized access.

Robust credential management for privileged and general user accounts. Automate storage and password rotation and enable secure credential sharing among teams.

Session management and monitoring offer real-time oversight and control over how users interact with sensitive data and systems. Detect and respond to suspicious user actions promptly and effectively.

Identification and onboarding of all privileged accounts with regular scans of your network to ensure proper management.

Key platform features

- ✓ Endpoint access control
 - ✓ Multi-factor authentication (MFA)
 - ✓ Secondary authentication
 - ✓ Role-based access control
 - ✓ Approval workflows
 - ✓ Time-based access restrictions
-
- ✓ Secure password vault
 - ✓ Credential sharing
 - ✓ Automated password rotation
 - ✓ Password check-in & check-out
 - ✓ Session recording and playback while secrets are in use
-
- ✓ Real-time session recording
 - ✓ Advanced search across monitored user activity
 - ✓ User activity reports and dashboards
 - ✓ Rule-based alerts and incident response
-
- ✓ Automated privileged account discovery
 - ✓ Scan scheduling
 - ✓ In-bulk account onboarding

Recognized and certified by the best

Syteca is trusted by 1500+ customers worldwide

About Syteca

Syteca, Inc. is a cybersecurity software vendor headquartered in Needham, Massachusetts. Since 2013, Syteca has been providing organizations with advanced UAM and PAM solutions, helping them minimize insider risk, mitigate data security threats, and achieve regulatory compliance.
