

Consulteer InCyber

Your Digital Security. Anytime. Anywhere.

Your Swiss Managed Security Service Provider

100% specialised in cybersecurity – with a consistent focus on Zero Trust principles.

“
**Security that works seamlessly
for people without disrupting
business – anytime, anywhere.**

Christoph Schulthess | CEO Consulteer InCyber

Our Approach. Zero Trust.

In a world where cyber-attacks are becoming increasingly sophisticated, Zero Trust offers more than just protection – it creates security and efficiency for your organisation.

Why is Zero Trust for you?

- **Improved control & compliance:** Easily meet regulatory requirements with end-to-end security policies and complete transparency.
- **Minimised attack surface & risk:** Strict access controls and micro-segmentation limit the spread of threats and effectively protect critical resources.
- **Increased flexibility & scalability:** Work securely from any location and dynamically adapt your security strategy to growing business requirements.
- **Simplified infrastructure & management:** Consolidate your security solutions and reduce complexity through centralised management.
- **Improved cost efficiency:** Reduce your IT costs over the long term thanks to fewer security incidents and streamlined processes.

With Zero Trust, we combine maximum security with optimum user-friendliness. This minimises risks, reduces costs and increases flexibility.

Our Security Services.

Security Consulting

Our Security Consulting Services have a modular structure. This enables us to respond flexibly to our customers' needs.

Managed WAAP

Robust protection for your web applications and APIs through defence against the latest threats and closing of critical security gaps.

Managed SASE

SASE combines point solutions for SD-WAN, network security and more in a standardised cloud-based service.

Managed IAM

Comprehensive protection of sensitive data, granular precise access control and efficient management of user identities for maximum security.
