

Security Transformed, Next Level Resiliency, AI-Powered Intelligence

New Veeam Data Platform

When threats are constant and time is scarce, you need more than backup. Veeam helps you lock down data, detect risks early, and quickly recover clean the first time, across cloud and hybrid environments. Cut downtime, simplify audits, and free your team from firefighting, so you can focus on moving your business forward.

Veeam Data Platform brings everything together. It provides a single, powerful solution for backup, recovery, monitoring, and threat detection across your entire environment. With policy-based automation, AI-driven insights, and built-in security, it helps you protect critical workloads, streamline operations, and recover fast when it matters most.

Enhanced Capabilities of Veeam Data Platform

Clean Recovery you can prove

Recover verified data quickly using isolated recovery environments, malware scanning, and immutable backups with evidence captured for audits.

Hardened, out-of-the-box deployment

Use the Veeam Software Appliance to get up and running in minutes. It's hardened, platform agnostic, and eliminates OS management and Windows licensing costs.

High availability for the backup server

Keep protection services online during planned or unplanned outages. Reduce single-points-of-failure and meet continuity targets.

Policy-driven orchestration and testing

Automate runbooks and non-disruptive drills. Validate RPO and RTO on schedule and keep proof ready for reviews.

Portable backups, no hardware lock-in or surprise costs

Move and recover across hypervisors and clouds. Keep costs predictable and options open as your environment evolves.

Instant Recovery to Azure

Restore workloads directly to Azure with no staging required. Minimize downtime and recover fast during critical incidents.

Strengthened security with precise access control

Enforce least-privilege access using granular role-based controls. Reduce risk, simplify compliance, and keep sensitive data protected.

AI insights for faster decisions

Use natural language guidance and real-time insights to optimize backup performance, solve issues faster, and detect risks early.

Monitoring, analytics, and compliance reports

Track health, capacity, and SLA status. Document immutability, access controls, and verification cadence for audits.

Stay resilient across hybrid and multicloud

Secure workloads in AWS, Azure, Google Cloud, Kubernetes, and on-prem from one unified platform. When disaster strikes, instantly recover to Azure and keep your business running.

About Veeam Software

Veeam, the #1 global market leader in data resilience, believes every business should control all their data whenever and wherever they need it. We're obsessed with creating innovative ways to help our customers achieve data resilience. We do that by offering purpose-built solutions that provide data backup, data recovery, data portability, data security, and data intelligence. Headquartered in Seattle, with offices in more than 30 countries, Veeam protects over 550,000 customers worldwide, who trust Veeam to keep their business running.
