

QUANTUM FORT

# CYBER SECURITY

Protecting your data, your business, your future.

QUANTUM FORT

# About us

Quantum Fort is a Swiss cybersecurity company based in CH-Schindellegi, SZ, with more than 10 years of practical experience in the digital security arena.

## ***We focus on:***

The integration of bespoke Cyber Security Control Tower platforms

Analyzing Cyber Risk through our proprietary risk identification suite

Supporting structured risk transfer through a BMA-regulated segregated accounts company

# What do we stand for

## **Clarity**

Cyber risk isn't abstract - we translate it into numbers and measurables people can understand

## **Resilience**

Protection is never absolute, but through continuity and the drive to improve every day it can always be secured

## **Trust**

We align with our clients' interests, no hidden incentives, no unnecessary complexity

## **Integration**

We are a One-Stop-Shop, we unify cyber risk quantification, mitigation, and support for structured risk transfer.

# What we bring to the table

## ***Measurable approach***

We show the financial impact of cyber risk before and after, bridging IT and the boardroom

## ***Integrated solution***

Instead of fragmented services, we combine cybersecurity and risk management in one system

## ***Business continuity as value***

We don't sell "security tools"! We enable uninterrupted operations, regulatory confidence, and long-term trust

## ***Our Model***

Realigned incentives and positive regulatory feedback loops create compounding benefits for clients

# What you can expect from QF Business

## Executive Risk & Resilience Overview

- **QF Score** – peer benchmarking, trends, and forecast breach, interruption, and loss probability – peer comparison and trend analysis
- **Loss exposure** – financial impact scenarios at \$1M / \$10M / \$100M thresholds
- **Predicted and recent security events** – sector- and geography-relevant
- **Compliance posture** – requirements and measurable attainment
- **Organization watchlist** – competitors, partners, and M&A targets

## Cyber Exposure & Infrastructure Overview

- ***Compromised credentials*** – peer benchmarking, trends, recommendations
- ***Threat landscape*** – detailed risk insights beyond threat actors
- ***Internet-facing infrastructure*** – peer comparison, trends, and actions across:
  - Email & DNS security
  - Vulnerabilities and open high-risk ports
  - Patch posture and cloud dependency
  - Infrastructure locations
  - Third-party and dependent organizations

# What you can expect from QF Enterprise

## QF Enterprise – Continuity & Compliance Suite

- Clarity on cyber risk. Operational continuity. Regulatory compliance. Financial resilience.
- Quantified exposure across IT and OT.
- Continuity-driven architecture and playbooks.
- Measured return on security investment (ROSI).
- Support for structured risk transfer for zero-day and systemic events
- One integrated system where quantification and mitigation support structured risk transfer seamless, discreet, and aligned to reduce risk.
- Regulatory confidence through measurable controls.

## **Analyze**

Quantify cyber risk in financial terms.  
Make risk actionable for boards and executives.

## **Mitigate**

Reduce exposure through resilient security architecture.  
Protect continuity across IT and OT.

## **Transfer**

Control what cannot be prevented. Support the transfer of  
residual risk into ring-fenced client structures.

## **Value Delivered**

Clarity on cyber risk.  
Measurable continuity.  
Control over the unavoidable.

QUANTUM FORT

# Continuity & Compliance Suite

## Tailored Cyber Risk Solutions for Regulated Industries

- Every industry faces distinct regulatory pressures, threat landscapes, and resilience requirements. Quantum Fort helps organizations quantify cyber risk in business terms, ensure operational continuity, and meet regulatory expectations with clarity and confidence.

### What Matters Most

Clarity on cyber risk.  
Operational continuity.  
Regulatory confidence.

## Industries We Support

### ***Healthcare***

Protecting patient trust, operational uptime, and regulatory alignment, (HIPAA, GDPR, NIS2, Swissmedic)

### ***Financial & Regulated Services***

Resilient operations, regulatory confidence, and board-level risk clarity, (SEC Cyber Rule, DORA, FINMA, GDPR)

### ***Legal & Professional Services***

Confidentiality, client trust, and continuity in sensitive matters, (GDPR, NIS2, professional secrecy requirements)

### ***Industrial & Critical Infrastructure***

Uninterrupted production, supply chain resilience, and protection against systemic shocks, (NIST, NERC CIP, IEC 62443, NIS2)
